Presentation of Assignment Experience as a Powerful Knowledge Transfer

It is important to Enhance Knowledge Transfer and Pair-working at any company (and especially in a consultancy firm), to display personal experiences and passionate approaches, and give insight to REAL customer projects and organisations. This is a simple format for Assignment Experience Presentations.

Presentation of Assignment experience in 4 steps:

1. the Situation & the Symptoms and Problems?
2. Thoughts & Actions
3. RESULTS
4. "My Tips & Trix" & new "principles".
Describe the project as a whole, then choose some situations and describe them in a more detailed way according to the "4-steps".
